

ACHRAF EDDAQQAQ

Front-End Developer | Blockchain & Web3 UI Specialist

Morocco · +212 657 775 681 · achrafeddaqqaq@gmail.com · linkedin.com/in/achrafeddaqqaq · github.com/aeddaqqa

PROFESSIONAL SUMMARY

Frontend developer specializing in React, TypeScript, and blockchain application development. Proven track record building production-grade Web3 interfaces including a non-custodial crypto wallet, a blockchain explorer, and a micro-frontend suite using module federation. Skilled at bridging design and engineering, collaborating with international teams, and delivering high-quality, scalable user experiences.

EXPERIENCE

Front-End Developer | Chain4Travel GmbH

June 2022 – February 2026

Düsseldorf, Germany (Remote)

Camino Explorer

A blockchain analytics tool enabling users to search transactions, addresses, and network activity on the Camino blockchain.

- Migrated the explorer from legacy code to React, improving performance by ~10% and delivering a modern, elegant UI
- Designed and shipped 12+ new features, refining code quality and improving overall user engagement
- Collaborated with designers and backend engineers to resolve performance bottlenecks and ensure cross-browser compatibility

Camino Wallet

A secure, non-custodial crypto wallet for managing CAM tokens on the Camino blockchain.

- Partnered closely with UI/UX designers to translate designs into pixel-perfect, accessible React components
- Integrated new features aligned with Camino blockchain technology upgrades

Camino Suite Application

A unified micro-frontend application combining the Explorer (React) and Wallet (Vue) into a single host shell.

- Implemented Module Federation to expose and share components across child applications
- Shared global state (theme switcher, network selector) across independently deployed apps
- Added protected routes and authentication flow within the federated architecture
- Collaborated directly with senior management to define project milestones (Epics, User Stories) and maintain project documentation

Front-End Developer | Leafunder

August 2021 – December 2021

Khouribga, Morocco

Startup building a collaborative incubation platform for entrepreneurs and mentors.

- Built the full frontend of the platform, including real-time messaging (direct messages, rooms) and notification systems

Freelance Frontend Developer | Fitness App

December 2021 – May 2022

Remote

Multi-user fitness platform with roles for customers, coaches, and admin.

- Developed the full frontend including booking system, training/nutrition plans, and progress tracking
- Built dashboards for coaches and management to monitor sessions and user activity

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, C, Shell/Unix

Frameworks & Libraries: React, Vue.js, React Native, Redux, Styled Components, Tailwind CSS, SASS, Bootstrap

Architecture: Micro-frontends (Module Federation), SPA, REST API integration, Web3/Blockchain UI

Tools: Git, GitHub, Agile / Scrum, Figma collaboration, Unix/Linux

EDUCATION

1337 Coding School (42 Network)

March 2019 – April 2024

Software Architecture program — peer-to-peer learning model, project-based curriculum in systems programming, algorithms, and full-stack development

Sultan Moulay Slimane University

September 2016 – July 2019

General Academic Studies Degree — Computer Science & Mathematics
